THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The main plant of the Stalin Works at Poznan is located in an area bounded by ul. Fabryczna, ul. Pamiatkowa, ul. Daszyńskiego (formerly Gorna Wilda), ul. Wspolna, and the track south from the main railroad station.
2. This area is intersected by ul. Trauguta and ul. Madalińskiego, near which there were recently constructed a number of buildings housing the Biuro Konstrukcyjne (Design Office), the Biuro Zapotrzebowan (Supply and Orders Bureau), the Ośrodek Szkolenia Zawodowego (Vocational Training Center), and the Factory Club.
3. Three shifts a day are worked for seven days a week, and there is great discontent among workers due to the high norms and low pay rates. A stokerkeeper, for example, receives 250-290 zł. a month. In addition to Poles, the plant employs Czech, Rumanian, and Hungarian engineers.
